For the prevention and cure of
BILIOUS AND MALIGNANT FEVERS
is recommended

HAHN's ANTI-BILIOUS PILLS

THIS Medicine has been attended with a degree of success highly grateful to the inventor's feelings in several parts of the West Indies and in the Southern and Middle States, &c.

The testimony of a number of person can be adduced, who have reason to believe that a timely use of this salutary remedy has, under Providence, preserved their lives when in the most alarming circumstances.

Facts of this conclusive nature speak more in favour of a medicine than columns of pompous eulogy founded on mere assertion.

It is not indeed presumptuously proposed as an infallible cure, but the inventor has every possible reason that can result from extensive experience for believing that a dose of these Pills taken once in every two weeks during the prevalence of our bilious fevers, will prove an infallible preventive; and further, that in the earlier stages of those diseases their use will very generally succeed in restoring health, and frequently in cases esteemed desperate and beyond the power of common remedies.

The operation of these pills is perfectly mild, so as to be used with safety by persons in every situation and of every age.

They are excellently adapted to carry off superfluous bile and prevent its morbid secretions—to restore and amend the appetite—to produce a free perspiration and thereby prevent colds which are often of fatal consequences. A dose never fails to remove a cold it taken on its first appearance: they are celebrated for removing habitual costiveness—sickness at the stomach and severe head-ache—and ought to be taken by all persons on a change of climate.

They have been found remarkably efficatious in preventing and curing disorders attendant on long voyages, and should be procured and carefully preserved for use by every seaman.

—

Hamilton's Elixir,

A sovereign remedy for colds, obstinate coughs, asthmas, sore throats, catarrhs, and approaching consumptions.—To parents who have children afflicted with the *HOOPING COUGH*, this discovery is of the first magnitude, as it affords immediate relief, checks the progress, and in a short time entirely removes the most cruel disorders to which children are liable. The Elixir is perfectly agreeable, and the dose so small that no difficulty arises in taking it.

—

Hamilton's Grand Restorative,

Is recommended as an invaluable medicine for the speedy relief and permanent cure of

Nervous Disorders	Violent cramps in the stomach and back
Consumptions	Indigestion
Lowness of spirits	Melancholy
Loss of appetite	Gout in the stomach
Impurity of blood	Pains in the limbs
Hysteric'l affection	Relaxations, etc.
Inward weaknesses and debility	

—

Hamilton's Essence and Extract of Mustard.

A safe and effectual remedy for acute and chronic rheumatism, gout, rheumatic gout palsy, lumbago, numbness, white swellings, chilblains, sprains, bruises, pain in the face and neck, etc. etc.

—

Lee's Ointment for the Itch.

Warranted an infallible remedy at one application, may be used with perfect safety by pregnant women, or on infants a week old, not containing a particle of mercury or any dangerous ingredient whatever, and not accompanied with that tormenting smart which attends the application of other remedies.

—

Hahn's true & genuine German Corn Plaister.

An infallible remedy for corns, speedily removing them root and branch, without giving any pain.

—

The Genuine Persian Lotion,

So celebrated among the fashionable throughout Europe, is an invaluable cosmetic, perfectly innocent and safe, free from corrosive and repellent minerals, the basis of other lotions, and of unparalleled efficacy in removing blemishes of the face and skin, freckles, pimples, inflamatory redness, scurfs, tetters, ringworms, sunburns, prickly heat, &c.

—

Hahn's genuine Eye Water,

A sovereign remedy for all diseases of the eyes, whether the effect of infirm weakness or of accident.

—

Tooth Ache Drops.

The only remedy yet discovered which gives immediate and lasting relief in the most severe instances.

—

Lee's Infallible Ague and Fever Drops.

For the cure of agues, remittent and intermittent fevers.

☞ At the place of sale pamphlets may be had gratis, describing cures performed by the above medicines; the number, importance and respectability of which, fully justify every article of this advertisement.

Fire Insurance.

THE Columbian Insurance Company of Alexandria, continue to insure buildings, furniture, merchandize and other property, from loss by fire. The conditions and terms may be learned upon application at their office, next door to the City Hotel, and will be found as moderate and equitable as those of any other company.

The rates of premium are calculated in reference to the actual risk of property, and are as low as 25 cents per 100 dollars per annum for hazards of the best description, increasing proportionably for risks of a more hazardous nature. Insurances may be made for one or more years, or shorter periods.

Columbian Insurance Office, Feb. 20

Proposals

FOR Publishing by Subscription, and now ready for the press, a series of historical volumes, which when finished will assume the title of

Universal History Americanised;

Or, an historical view of

Europe, Asia, Africa and America,

from the earliest records to the nineteenth century—with a particular reference to the state of society, literature, religion, and form of government in the United States of America.

BY DAVID RAMSAY, M. D.

"Life is so short and time so valuable, that it were happy for us if all great works were reduced to their quintessence." *Sir William Jones.*

—

PROSPECTUS.

ASIA.

The Asiatic part of this work contains a general view of the antediluvians—of the general deluge—of the re-settlement of the Globe after that great event—of the primitive postdiluvian nations, which were formed in Asia, the cradle of the world. Their various ramifications, revolutions, and of the general course of Empire.

AFRICA.

The African part, contains a concise history of Egypt, Carthage, Numidia, Mauritania, Abyssinia, of the Piratical States, and the Hottentots, with a grouped view of its uncivilized settlements.

EUROPE.

The European part, contains the history of Greece and Rome, from their origin to their dissolution—of the various nations which were conquered by them—and of the nations by which the Romans themselves were finally conquered, and of the nations which were formed from the fragments of the Roman Empire, and the various revolutions of the latter, together with a view of the nations which never were subjected to the Romans.

AMERICA.

The American part, contains a general history of the Western continent, under the heads of Free, European, and Aboriginal or unconquered America. The first contains a history of the United States, from their first settlement as English Colonies, till the present time.—The second, of all parts dependant on Europe.—And the third, of all that are still owned by the Aborigines.

It is expected that the whole will be comprised in 10 or 12 octavo volumes, of between four and five hundred pages each—to be printed in Philadelphia, on good paper and fair types, for $3 1-3 per volume, in sheep binding, or $4 1-3 Calf Gilt, to be paid for on delivery.

AUTHORITIES.

This work has been in contemplation upwards of 40 years. The project of it was conceived in 1786, on reading the Universal History, then recently edited in 60 volumes, by a society of gentlemen in England. The original idea of extracting the quintessence of that voluminous work, which contained the most complete system of history the world had then seen, has ever since been enlarging and improving by an attentive perusal of the histories written by Robertson, Hume, Gibbon, and other modern authors—of the Asiatic researches—of the works of Sir William Jones, and other learned Orientalists—the publications of intelligent travellers, who, in the course of the last half century have explored almost every region of the Globe. These collectively have thrown a blaze of light on countries comparatively unknown, and on portions, both of ancient and modern history which were confused and obscure at the period when the writers of the Universal History published their work. The arrangement of materials collected from these sources commenced in the year 1780, when, in consequence of the surrender of Charleston to Sir Henry Clinton, the author was suddenly released from a sea of business and sent as a prisoner of war to the British Garrison then in St. Augustine, and there confined for eleven months, without any peculiar employment. Steady progress has been made for the last ten years in correcting and transcribing the work for publication.

UNITED STATES.

The History of the United States is given at full length—that of foreign countries is more or less expended or contracted in proportion to the intrinsic importance of each—its tendency to illustrate portions of Holy Writ—the Greek and Latin Classics—and also in proportion to its connexion with the U. States, or as furnishing useful practical information to its citizens, or as the paternal soil of their ancestors.

The above sketch of the nature and objects of this immense work, which has occupied the attention of the Author for upwards of 40 years, was found among his papers, and is now given to the public in his own words. Since that period, a few chapters have been added by the Reverend SAMUEL STANHOPE SMITH, which brings it down to the close of the last war.

The publication commences with a third impression of the History of the U. States, in three volumes, which is all that has ever appeared. The whole will not be delivered under 15 or 20 months. It is proper to state, that the gentlemen who have the direction of it are neither booksellers nor printers, and receive no pecuniary consideration for their trouble—but are willing to make the necessary advances to carry it into execution provided the sale is warranted by public patronage. The profits arising are to be appropriated for the support and education of his children, four of each sex: to them its success is a matter of deep importance.

Charleston, S. C. April, 1817.

☞ Subscriptions received at the Alexandria Gazette Office.

Sales at Vendue.

On every Tuesday and Friday,

WILL BE SOLD,

At the Vendue Store, corner of Prince and Water Streets,

Dry Goods, Groceries, &c:

Particulars of which will be expressed in the bills of the day.

Original Miscellany.

PROVIDENCE....NO. VI.

"As particles, as atoms ill-perceived;
As circulating globules in our veins,
So vast the plan."

An infidel without learning, of all men, must be the most miserable. Not a man of science to seek pastime in his books, he generally spends his hours in the debauchery of his senses, and continues dead to the charms of religion, and unaffected with pleasure of the most pure and elevated kind. I mean that pleasure which the good man enjoys (it matters not however illiterate he may be) on a contemplation of the works of nature;—and when he discovers their divine author through the assistance of these, "as through a glass darkly," and is lead to laud his infinite perfections, though he is removed at an inconceivable distance from his sight.

In this employment, agreeable to divine revelation, *even* angels in heaven are engaged, and taste in this their purest joys. Pious Isaac, though, of all the Patriarchs, the least distinguished for his mental endowments, went out to meditate in the field at the even-tide. Notwithstanding, the infidel is a gloomy stranger to these religious exercises. He is wretchedly ignorant of the nature of those emotions which the exclamation "My father made these," lighted up in the christian's heart, when his eye rooted in delightful contemplation amongst the works of nature. Their views are extremely different. The sceptic sees no smiling intelligence in fragrant fields;—nor none alike in sandy desarts. *Chance* flung *this* pebble on the sea shore; *accident* dropped *this* germinent seed in the earth, which sprouted forth, and in time grew up a beautiful flower, pleasing to the eye by the variety of its hues, and refreshing to the scent by the deliciousness of its fragrance!

But we feel thankful, for the honor of Divine Providence, that the principles of infidelity are passing away, and the Epicurean philosophers had but few professed friends in this country. In truth we may say that the gardens of Epicurus are now looked upon with abhorrence by every person possessing the smallest particle of light or spark of virtue; and if here and there one victim out of the multitude falls a prey to his scepticism, yet then is it a cause of shame and grief to them more than of their glory and their boast.

Deists, however, have less of this honest crimson about them; and although the world abounds much more with them than the majority of people think—although infidelity has passed into a thousand different modifications, and like a hydra with many heads, if we destroy it in one shape, it will assume another, we still believe that an atheist is rarely to be met with in this age of sound philosophy and evangelical light—a child of Epicurus; one who "hath said in his heart there is no God," and looks in silent horror on death as the hour of cold and dark annihilation!

As we have said, on a former occasion, that the earth was a full demonstration by itself of the being, power and wisdom of God, we wish to set this proposition in a new point of view.

Who then is not struck with the figure of the earth? with the appearance of the mountains and valleys, vales and woods, that are exhibited on its surface, and cannot see God in this division of the globe into seas and dry land? Let it be borne in mind that these oceans of mighty water rolls between nations who frequently, were they not obstructed by these "mountains on the deep" from invading each other, perhaps would dye the waves with the purple of human blood. Nothing else, in all human probability, would prevent it. For they are as hostile as dissimilarity in sentiments, customs, manners, laws, languages, religion and government, can make them; and to us no other check appears to be given to the ambition of their kings but the waves rolling in proud defiance between them.

In support of this argument we might appeal to profane history, and produce several examples among the ancient nations where they were driven from the bloody purpose of war solely by a sight of the difficulties they had to encounter on the sea. A view of the obstacles that met them here suppressed their ambition at home, and thus, probably, a whole nation was saved from the sword. And examples are not wanting in which, even after they had invaded a foreign power, they were prevented from doing them much injury by this very cause, and compelled at length to make a good retreat home. For example, witness Xerxes' invasion into Greece—the defeat he suffered in that expedition, his hasty flight home, and his bridges of boats, originally built across the Hellespont for the transportation of his numerous army, now broken and shattered by storms.

For the punishment of its inhabitants, the world is not permitted long to enjoy the blessings of peace. War is the scourge which Divine Providence chastises nations with. And their tranquillity too often, alas! like the treacherous calm, only portends a thicker tempest gathering in the heavens; when nation again shall rise up against nation, and kingdom against kingdom, and the earth become the theatre of war and scene of fierce contentions. But we ask, who cannot see in seas and in oceans a barrier raised up by the hand of Divine Providence in infinite wisdom for their preservation? A barrier of God to fence in less powerful nations from the ambition of more potent kings.

Nor in this place can we forget the Red Sea—a sea so memorable in sacred history, where God overthrew Egypt with a great overthrow, and redeemed his Israel with a stretched out arm.—Well might Israel sing on the banks of the Red Sea, while their enemies were perished before them, "Who is like unto thee, O Lord, among the Gods? Who is like thee glorious in holiness, fearful in praises, doing wonders?" Well might Israel rejoice there with great rejoicing, and say, "I will sing unto the Lord, for he hath triumphed gloriously: the horse and his rider hath he thrown into the sea!"

Hence, that God may be plainly seen in this order of his providence, we think needs no other demonstration. Revelation, as well as all nature, ascribes him sovereignty over the seas—"The sea is his, and he made it; and his hands prepared the dry land." And we believe in the inspired language of sacred writ, "that he shut up the sea with doors, when it broke forth, as if it had issued out of the womb. And he set bars and doors for it, and said, Hither shalt thou come, but no further; and here shall thy proud waves be staid?"

Now, what if we denied the sovereign of universal nature? Suppose for a moment—but we shudder at the thought—we turn atheists: then the difficulty would be as great in believing in the eternity of matter as in the eternity of spirit, and still greater in accounting for all this order in nature without any intelligence residing somewhere—say, in some eternal mind.

Z.

FROM OUR CORRESPONDENT AT WASHINGTON.

Thursday, March 26, 1818.

Mr. Clay's amendment to the Appropriation Bill was again taken up in a committee of the whole, and was under discussion the whole of yesterday till five o'clock. Mr. Clay spoke for three hours in favor of recognizing the independence of the new government of Venezuela, and sending a minister there: and as on the day before he exerted his eloquence in displaying in the strongest colors the folly and tyranny of Ferdinand, and in endeavoring to demonstrate that it was by those he alienated the affections of the people of S. America—so he yesterday directed his arguments to proving that in a commercial and political view, this country had the most important interests in the success of the revolutionary efforts of Spanish America, and that those states, if independent, would be immediate allies with us for the preservation of neutrality, whenever European powers should be involved with each other in war. That in a commercial point of view we were importantly interested in their independence, he endeavored to show by stating, amongst other things, that the exports of Spanish America were eighty-one millions of dollars, of which three fourths were of the precious metals—and that the far greater part of that would, in the commercial intercourse between that country and this, fall to the share of the United States. What we should give in return for that sum he endeavored to account for, by saying, that tho' our manufactures at present scarcely amounted to three millions of our own, yet as the house was then legislating for future ages, it was reasonable to conclude that we should have, *in time*, abundance of manufactures to meet it. Besides, we were not, he said, to confine our estimate to what we could supply by our own industry and soil; since by commerce, as it was now understood and practised, every quarter of the globe was tributary to our trade, and one cargo of our exports often contained the products of all parts of the world. And this led to the consideration of our tonnage, the employment of which in transporting the traffic of all parts of the world to South America in exchange for the precious metals, would make an important augmentation in our navigating interest. As the powers of Europe, and particularly Great Britain and France were, generally speaking, a much larger portion of their time at war than in peace, it was certain that during their contests, the ships of the United States would be the sole carriers of the Spanish American provinces, which from the want of harbors (the proper nurseries of seamen) and the want of that spirit of enterprise peculiar to our northern states, could never become a great maritime power. Besides these advantages, the friendly dispositions of persons enjoying forms of government like our own, and therefore animated by fraternal feelings towards us, being placed upon the south boundary of our territories, would operate as a defence to the country in that quarter, and be a barrier to guard the Mississippi and our southern and western states from European nations; while if Ferdinand were in possession of those provinces, we should be continually exposed to his attacks. Were those provinces to choose for themselves monarchical governments, still Mr Clay thought that we might look to them for amicable partial feelings, if we deserved them by our friendly conduct to them;—but he believed that they would more probably be republican; since they had generally adopted in all their public writings and manifestoes the principles of our government, and in Venezuela even taken the words of our constitution—to prove this he read some passages from their manifestoes.

Mr. Clay said that he did not think it necessary or adviseable for us to go to war for the purpose of aiding those provinces—but all that we could do, consistently with our obligations of neutrality, we ought to do. We ought to acknowledge their independence——we were bound to be the first to take them by the hand, and not wait for the example of other powers to recognize them.—By our own practice he said, we were bound to do so. When the first minister came from the French Republic, Washington did not wait for other powers to show the example.—So too, Mr. Madison, in the case of Spain acknowledged the government then subsisting *de facto* by receiving its ambassador. He thence turned to the question of probable danger arising from our recognition of those governments: and said that Spain was so far from being able to go to war with us, that she had not even a chance of reducing her insurgent colonies—since in four years which had elapsed from the return of Ferdinand to the throne, he had not been able to recover his dominion over Venezuela alone, though the weakest of them all. It was absurd then to suppose that he would venture to undertake a war against us which would inevitably lose him all his colonies—And as to the powers of Europe there was not one which was not deeply interested in the independence of Spanish America. As to England she was forbidden from interfering by honor, justice, and interest. Mr. Clay modified his amendment (for which see yesterday's letter) by fixing the commencement of the salary and outfit at any time the president should chuse—and by setting the salary at a sum *not exceeding* eighteen thousand dollars.

Mr. Forsyth opposed the amendment on the ground that if even all the speaker had said were correct, it would not justify such a measure. If there were to be a minister sent from either to the other, he said, it ought to be by the Spanish provinces. It was not for us to send one to them to acknowledge their independence. The speaker had just said that he did not wish for war—why then did he express such pleasure a few days ago at the intimation that Spain should be soon made responsible—why say that he thanked God *he* had not such Job-like patience as to endure the wrongs of Spain. Mr. F. said, for himself, that neither did he wish for war with Spain; but he was desirous that we should take into our possession some of the property of Spain, out of which to reprise our citizens for their losses. The speaker had said that we owed our sympathy to those revolutionists on account of the resemblance of their situation to what our's once was. This Mr. Forsyth denied, and drew a masterly picture of the origin of the South American revolution, in order to show that there was no resemblance between the two events, and adduced several instances to show that they had not revolted from love of liberty, but by chance were forced into it; and that the conduct of those in power was in many instances tyrannical and despotic. We had, he said, a cause of quarrel of our own with Spain, and he did not wish to injure it by mingling it with an affair that did not belong to us, or to leave it in the power of Spain or the world to tarnish our cause by charges of having outraged without provocation, and violated the neutral rights of Spain. We were already, he said, in point of acts of friendship to the Patriots, in advance of the rest of the world, and had done every thing consistent with our own safety that could be either necessary or useful to them or to us. So that, in fact, the Spanish Americans had as much now from us as they could possibly have if they were recognized by us to-morrow.

The committee then rose, reported progress, and obtained leave to sit again.

A message from the president was read, informing the house that for the reasons therein mentioned the troops of the United States have been ordered to enter Florida in pursuit of the Seminoles.

The Three Sisters, arrived at Savannah from the Matanzas in ten days, reports produce very scarce and high.

The Buenos Ayrean brig of war Gen. San Martin, has sailed from Savannah on a cruise, having on board of her the Venezuelian Minister Don Pedro Gual. It is intimated that he intends landing at Aux Cayes. [*Charleston Times.*

STEAM BOAT ON LAKE ERIE.

We are happy to learn, that a company has been formed in Albany, for the purpose of constructing a steam boat on Lake Erie. Mr. Noah Brown, ship builder of New-York, is the contractor for the completion of it. He has arrived here with part of his hands, and will commence the work immediately. It is intended to be ready for the Lake by the 1st of June next.

[*Niagara Journal, 30th ult.*

From the Boston Palladium, March 20.

FROM GUADALOUPE.

We have received from our correspondent at Guadaloupe, papers to the 19th of February.

We have also received a handbill containing the regulations in full for American vessels, which arrive at the ports of Guadaloupe where they are admissible, viz. at Point Petre and Basseterre.

Vessels may lay off and on before Point Petre, on the Master's going on shore and obtaining a permit, for which he must pay two dollars, otherwise he will be fined 61 dollars.

Vessels entering the port are to admit no boats to come alongside previous to being boarded by the health, harbor and custom-house officers, and must deliver the registers.

No passengers must be landed till permission is obtained, and the passports on a list be given to the king's attorney.

Manifests of the cargo and adventures, and a list of the crew must be given.

Vessels entering Point Petre, whether they sell or not, must pay, if under fifty tons, 25 dls 16 cents; between fifty and one hundred, 31 83; between one hundred and one hundred and fifty, 39 22; between one hundred and fifty and two hundred, 50 18; two hundred and one and above, 62 90; and 50 cents a ton.

Live stock is free of duty.

Lumber, timber, dyewood, coal, rice, corn, vegetables, hides, leather, skins, rosin, tar—three per cent.

Salt beef—three per cent, and besides 62 cents per cwt.

Codfish—one and an half per cent, besides 62 cents per cwt.

Salted and pickled fish—one and an half per cent.

Foreign rum—10 sous per gallon.

Cocoa, indigo, rocou, turtle shell, peruvian bark, cassia fistula, sarsaparilla, ginger elephant's teeth, whalebone, pepper, pimento, cloves, nutmegs, mace, leaf tobacco, salt, fish oil, horses—three per ct.

Articles not enumerated are p... and must be entered, if on board ... portation.

The produce and manufact... France may be exported free of ...

Rum and molasses are the only ... al produce permitted to be ... duty three per cent.

Exchange on France. 185 livres ... currency, for 100 francs of Fr... Spanish dollar 10 livres Guad. cu... —a current dollar 9 do.—Spanish ... loon 16 Spanish dollars or 160 livres ... rency—a guinea 49 livers 10 sous ... three drams 54 grains, 83 livres 5 ... all kinds of gold coin pass current ... tuguese and Spanish gold at 22 liv... sous the dram of 72 grains—Amer... 20 livres 5 sous per dram of 72 grains.

French vessels are allowed to ... flour into their colonial ports from ... reign ports till the end of Oct. 1818.

The ports of Marie Galante are ... to foreign vessels.

Duties on vessels in St. Bartholom...

For laying off and on the harbor ... twenty-four hours.

A ship	-

Vessels not measuring 30 tons are free from this charge, and vessels under fifty tons have only to pay one dollar.

CUSTOM HOUSE DUTIES.

Inward.

1. East and West India produce and merchandise, (dry goods excepted) cattle, horses and stock, beef, salt fish, corn and corn meal, ground and garden provisions are free.

2. Grain, flour and barley of all kinds, pork, butter, tallow, lard, hams, cheese, soap, oil, candles, paint, pitch, tar, rosin, oakum, turpentine and drugs, iron hoops, and lumber of all kind and denomination, with the exception of East and West India, pay one per cent.

3. All other goods and merchandize without exception, pay two per cent.

Outward.

1. All goods free from inward duties, pay 3 per cent for exportation.

2. All other goods (except dry goods which are free from exportation) pay two per cent.

AS IT SHOULD BE.

The legislature of Massachusetts have passed an act prohibiting any person from practising physic in that state unless he has received a medical degree from some college or university, or college of physicians. Three physicians are to be appointed in each county of the state, with power to examine candidates and give licenses. Similar regulations have for some time existed in Connecticut and in other states.

The legislature of Massachusetts have, besides endowing the medical college of that state, granted an annual sum of ten thousand dollars to that institution for ten years. The Rumford legacy to this institution, as recently ascertained, amounts to eleven hundred dollars per annum, according to the will of the illustrious count.

The state of Maryland, in her grants for medical improvement, surpasses Massachusetts; and two hundred thousand dollars have been allowed by law to be raised for the promotion of medicine, and the collateral branches of science.

Kentucky, in order the more effectually to secure the advantages of education to her citizens, has appropriated more than two hundred and fifty thousand dollars to Transylvania University. Dr. Drake, so well known for his picture of Cincinnati, has been chosen the professor of materia medica and botany, in the medical department of that university. The period we believe is not far distant when our American youth will deem it equally absurd, to go abroad for medical education, as to visit the old world, for improvement in religion and morals.

The following interesting article, wa...

copy from the London Literary Gazette of the 10th January:—

THE PATENT COMPLETING PRINTING MACHINE.

In our last number we mentioned that the Literary Gazette was the *only* Journal in the world printed by this most admirable machine; and as a matter of extraordinary mechanical interest we subjoin a brief account of the process by which about a thousand of these large sheets are *per hour* produced by this magical invention. The beauty of the movements, their rapidity, their precision and advanced to the imagination by the nature of the operation they perform: it looks as if *mind* and not *matter* were at work. We see a boy lay a white sheet of paper upon the web (here described) and while we tell *three*, it is received by another boy, as flour comes from the mill, a perfect newspaper, printed on *both sides*, with a degree of unequalled force, clearness and correctness. A more gratifying scene than the action of this piece of mechanism, it is impossible to conceive; it seems the very climax of human ingenuity, and if ever a thing of the kind merited public admiration and acknowledgment, we hesitate not to say that it is this wonderful apparatus.—Printed in the house where Samuel Johnson lived and died, by a machine as curious and unique as his endowments were stupendous and unrivalled: the Literary Gazette now presents at least two incidental attractions, in addition to those which have been already honored with such cheering encouragement.

We request the notice of our readers to our page as a specimen of the art of printing by the singular means devised and perfected as below explained.

About ten years ago Mr. Bensley was applied to by Mr. Konig, a Saxon, who submitted to him proposals for joining him in the prosecution of a plan for improving the common printing press, which consisted chiefly in moving the press by machinery, by which the labor of one man might be saved. A press was formed on this plan; but the result was so unsatisfactory as to induce the rejection of it altogether. It will readily be conceived that this resolution was not taken till after numberless experiments had rendered the prospect of success hopeless. The idea of cylindrical impression now presented itself, which had been attempted by others without success; and a machine on this construction was completed, after encountering great difficulties, at the close of the year 1812. It may be proper here to introduce an outline of its operation.

The *form* (*i. e.* the composed types) is placed on a carriage or coffin, which is constantly passing under the inking cylinders, obtaining a coat of ink in its ingress and egress; these cylinders have a lateral and rotary motion, for the purpose of equalizing the ink before it is communicated to the form. After the *form* is thoroughly inked, it passes under the printing cylinder, on which the paper is laid, where it receives the impression and thence delivers itself into the hands of the boy who waits to receive it. This is termed a single machine: by the assistance of two boys it prints 750 sheets on one side per hour. As despatch, however, is of the utmost importance to a newspaper, it was deemed adviseable to construct what is called a double machine. This differs in no respect from that above described, excepting the addition of a second printing cylinder, by which means, with the assistance of four boys, 1100 sheets are printed within the hour on *one side*. The machines used for printing the *Times* newspaper are on this plan, and have now been constantly in use since November 1814. After the *Times'* machines were constructed, the grand improvement of the *Completing Machine* was suggested, so called for its delivering the sheet printed on *both sides*. It has a double inking and printing apparatus, with two carriages or coffins, each large enough to admit a *double demy form* 54½ by 21 inches. The paper is laid on an endless web, called the feeder, which revolves at intervals; thence the sheet passes into the machine, and is ejected in a few seconds printed on *both sides*. By this means 900 sheets are struck off in an hour, printed on both sides, or 1800 impressions; if the double sized paper be used, 3600 single impressions. Two boys and an over-looker are all the assistance requisite, and a steam engine of one horse power is sufficient force to impel it.

The Patentees must feel a just pride in the completion of such an arduous undertaking, after so many years of labor and expense; it is not the least gratifying circumstance attending it, to consider that in England so important an invention has been matured, which had been previously rejected by all the principal cities on the continent; for the inventor (Mr. Konig) spent no less than two years in seeking patronage in Germany and Russia, till at length, to use his own words, he was "compelled to take refuge in England, the only country where mechanical inventions are fully rewarded."

☞ The Subscribers to J. E. Worcester's Universal Gazetteer, are informed that the work will be delivered at their respective places of abode without delay. ☞ A few copies, in addition to those already subscribed for, may be had by inquiring immediately at the store of S. & T. Died,

On Monday last, the 23d instant, Mrs. Rebecca Washington, consort of Dr William Washington, of this town, in the 20th year of her age. She has left a fond husband, three infant children, and a numerous train of friends and connexions to deplore her death.

The old and the infirm sink into the grave, and we marvel not. It is the course of nature. The weeds and brambles of society are cut down and withered. Why should they *cumber the ground?* But when the young and the vigorous, the good and the useful, are prostrated in the dust, Christain faith alone can comprehend the design, and Christian hope submit with resignation to the event. To these divine principles, which soothed and supported the deceased in the awful hour of dissolution, her afflicted friends must look for consolation.

"Early, bright, transient, chaste, as morning dew
She sparkled, was exhaled, and went to heaven!"

MARINE JOURNAL.

PORT OF ALEXANDRIA...MARCH 26.

CLEARED,

Brig Dove, Barrett, Madeira.
Schr Jerningham, Arnold, Geo Town.

ARRIVED,

Schr Philadelphia, Hand, 7 days from Philadelphia, with an assorted cargo to merchants of the district.

Brig George Washington, Cushing, 9 days from Providence; rum, gin, &c. to E. Corning.

Schr Allegro, Welsh, 10 days fr. Camden; lime, lumber, &c. to J. G. Ladd & Co.

Schr Planet, Dyer, 7 days from Portland; plaister, &c. to Lawrason & Fowle, and furniture and waggons to S. Ward, and N. Blasdell.

Schr Henrietta, Nevett, 3 days from Baltimore, with a full freight, to merchants of the district. On Monday saw a brig at anchor off Blackston's Island, and another at the foot of the Narrows, bound up—both had the appearance of having been ashore. On Tuesday, in Nanjemoy Reach, saw schr Freemason, Herbert, hence, for Norfolk—the schr had been ashore in the gale of Saturday—had landed part of her cargo, consisting of flour, by which means she had got off, and was taking in again. Same day, off Ragged Point, saw ships Thomas and Atlas, and schr Adeline—also 2 brigs, off George's Island, all hence, proceeding down.—Capt N. observes, the late gale was not severe in the harbor of Baltimore.

Also arrived this morning, 30 sail of inland vessels, with their usual cargoes.

Steam Boat Report.

The Washington got up at 5½ P. M.—This morning saw a full rigged brig off Maryland Point, standing up.

March 16 mw2w

Fan-Sash Making

METAL FAN-SASHES, of various descriptions, will be made by the subscriber, at his shop, lower end of Duke street. The want of a Metal Fan-Sash Manufactory in Alexandria, has hitherto been severely felt by builders and others, who have been compelled to make use of wood, which is neither elegant nor durable. The various forms into which the metal can be shaped have given it a decided superiority, and the difference in the price is very trifling. The subscriber has been at considerable expence in procuring the necessary preparations, and relies on public enterprise for success in the undertaking.
Gentlemen in the country, by sending the dimensions of their sashes, can have them made at the same price as if in town.
JAMES T. HOLLAND.
February 19

M'Guire & Co.'s lumber yard, which streets are paved. Also, sundry Lots on Water and Princess sts.

March 16 J. C. HERBERT.

To Rent,

A TWO STORY BRICK DWELLING HOUSE, near the Diagonal Pump; the house is large and commodious, having a large garden, with the necessary back buildings, milk and smoke houses, and pump of water in the yard equal to the Diagonal. For terms apply to WM. VEITCH.

December 24 wtmtf

Valuable Property for Sale.

THE Subscriber having removed from Alexandria, offers for sale, on a liberal credit, the following Valuable Property:—

His Wharf and Warehouses, at the intersection of Union and Princess streets, at present occupied by M. Miller, Esq.

A Dwelling House and Lot on Princess-street, between Union and Water streets.

Two Dwelling Houses and two vacant Lots adjoining, on Princess street, between Water and Fairfax streets.

Two large Brick Warehouses, corner of King and Columbus streets—the best stands in Alexandria for the flour and grocery business.

A Dwelling House and Lots adjoining the above, on King-street, at present occupied by Mr. Rooker.

A vacant Lot on Commerce-street, near the warehouses of Mr. Gibson.

A Lot containing 7 acres, adjoining the Little River turnpike gate No. , enclosed and in fine order for cultivation.

Any of the above described property will be sold on very liberal terms—for which please apply to John Dundas, in Alexandria, or to the subscriber residing in Baltimore. W. H. DUNDAS.

January 23 d3wtmtf

Sully for Sale

THIS Estate, situated in the county of Fairfax, twenty two miles from Alexandria, and the same distance from Georgetown, contains about seven hundred and fifty acres. Little River Turnpike passes through it half a mile from the dwelling house. The situation is handsome, and remarkably healthy; the water is good and abundant. The soil which was originally excellent, has for some years past had the advantage of improving husbandry, Plaister of Paris acting with powerful and immediate effect on all grasses and grains. The fields present a good surface for cultivation, and those now untilled are covered with red clover. The orchards are very large and thrifty; the collection of table fruit is choice and various. The mansion is spacious and well constructed: the out-houses are conveniently situated, and the whole have been lately thoroughly repaired and painted. The farm houses, which are all nearly new, are expensive and excellent in their kind.

For a gentleman of leisure this would be a delightful residence; and a profitable estate for an active farmer. The title is indisputable, and perfectly unincumbered.

A number of well taught orderly young men, with good stocks and farming utensils of all kinds and the crops of the present year if desired, will be at the command of the purchaser.

Application may be made to the subscriber, living on the premises, next the post-office at Pleasant Valley, in Fairfax.

FRANCIS LIGHTFOOT LEE.

September 19 tuftf

ORDERED by the orphan's court of Charles county, that all the PERSONAL PROPERTY of the late Benedict Boarman, near Bryantown, deceased, shall be exposed at public sale, (Negroes excepted) on a credit of sixty days for all sums exceeding ten dollars, all under cash will be expected. Notes with approved securities must be given. The sale to commence at 10 o'clock on Wednesday the 1st April, 1818

GEORGE S. BOARMAN,
HENRY S. ONESTREET.
Executors of Benedict Boarman.

For Rent,

THE Rooms over and Back Buildings attached to the Fire Insurance Office on Royal street.

Apply at this office.

December 23

To Rent,

A CONVENIENT STORE and DWELLING on Prince-street, now occupied by Mrs. Coleman. For terms apply to JAMES GALT.

One VACANT LOT, corner of Fairfax and Wilkes streets. Also,

Two HOUSES and LOTS on Wilkes street, occupied by Mr. Frazier. Also,

One HALF WATER LOT near the property of Joseph Dean. Also,

A VACANT LOT, corner of Wilkes and Royal streets.

For terms apply to

March 18 WM. HERBERT, Jun.

For Sale,

THAT large and commodious three story brick Dwelling House in King street upper end, at present occupied by Dr. George F. Thornton. For terms apply to WM. HERBERT, Jun.

May 21 ws

For Sale or to Rent,

THAT extensive and valuable property at the south east corner of King and Henry streets, comprising two STORES and DWELLING HOUSES. The corner store very handsomely fitted up for an Ironmongery and Hardware establishment, lately occupied by Messrs. Richard Slade & Co. and as a stand for that business is equal to any in town.—The other store is fitted for the Grocery business. This property may be purchased upon a very liberal credit, or it would be exchanged, at a fair valuation, for property improved nearer to the river. Enquire of

MANDEVILLE & LARMOUR.

February 28

Re-sale of Valuable Lands,

FOR READY MONEY

THE terms of a former sale not having been complied with, in pursuance of a decree of the United States' circuit court of the District of Columbia, for the county of Alexandria, directing a re-sale of the tract of land called the Glebe Lands, in case the terms of the former sale should not be complied with, we, the subscribers, shall, as commissioners under the decree of the circuit court of the District of Columbia, for the county of Alexandria, expose to sale for ready money at public auction, on Saturday the 18th day of April next, on the premises, that desirable Tract of Land, in the county of Alexandria, commonly called the Glebe Lands, situate about 2 miles from Georgetown ferry and 7½ from Alexandria, containing 566 acres, by survey;—one half of which is well timbered with oak, hickory and chesnut. It is handsomely situated, good water, and a fine young orchard of the best selected apples and cherries. The land will be sold agreeably to survey, more or less. The title papers may be seen at any time on application to the subscribers. The sale to commence at 12 o'clock.

Valuable Family Medicines.

JUST received, direct from the proprietors, the following valuable MEDICINES, all of which have been in use for a number of years past, in almost every part of the United States; have been highly patronized by people of the first respectability; and approved by those who have had occasion to make use of them, for the cure of those disorders for which they are severally calculated.

Dr. Lee's Genuine (Windham) Bilious Pills,

Universally known and used throughout the United States as a family medicine. The fame of these pills has become so great, that many have attempted to counterfeit them—to guard against this, the proprietors have procured a stereotype label, and each box of Genuine Lee's Pills will hereafter be enclosed in one of these labels, with these words on the sides: "Lee's Genuine Windham Bilious Pills," and on the end of the label the words, "Samuel Lee, patentee, &c. I. Thompson, agent, joint proprietor," &c. and should any be offered for sale without said label on them the purchaser may be apprised that they are counterfeit.

Dr. Thompson's celebrated Eye Water.

For the cure of inflamed and sore eyes of almost every description. This valuable preparation comes highly recommended from the most respectable sources.—Price 50 and 25 cents a bottle.

Dr. Rawson's Genuine Itch Ointment.

A certain and safe cure for that disagreeable complaint, as well as other irruptions of the skin. Price 37½ cents a box.

Dr. Rawson's Anti-Bilious and Stomachic Bitters.

For weakly and infirm constitutions. Price 87½ cents a box.

Hinckley's Infallible Remedy for the Piles,

A most valuable medicine. Price 50 cents a box.

Thompson's Aromatic Tooth Paste,

For whitening and preserving the teeth—it may be used with the greatest safety. Price 50 cents a box.

Specific Drops for the Tooth Ache,

Which, in almost every case, gives instant relief in that distressing complaint. Price 37½ cents a bottle.

Cooley's Vegetable Elixir, for Coughs, Asthmas, Consumptions, &c.

A very valuable medicine in those complaints. Price 50 cents a bottle.

For sale, in Alexandria, by Dr. *Rich'd. H. Little*; in Washington City, by Dr. *David Ott*; in Georgetown, by Dr. *John Ott, Otho M. Linthum & Co.* and *Nathaniel Jewett.*

James Kennedy & Son,

RESPECTFULLY inform the public that they have just received from

LEE's MEDICINE STORE,

No. 46, Maiden lane, New-York a fresh supply of the following valuable MEDICINES:

Hamilton's Worm destroying Lozenges,

Which have within sixteen years past cured an immense number of persons of both sexes of every age and in every situation, of various dangerous complaints arising from WORMS, and from obstructions or foulness in the stomach and bowels.

This medicine bears no analogy whatever to others of similar titles so commonly complained of as operating with violence; on the contrary a particular excellence of this remedy is its being suited to every age and constitution. It contains nothing but what is perfectly innocent & is so mild in its operation that it cannot injure the most delicate pregnant lady or the tenderest infant of a week old should no worms exist in the body; but will without pain or griping cleanse the stomach and bowels of whatever is foul or offensive, and thereby prevent the production of worms and many fatal disorders. The lozenges are particularly efficacious in carrying off all gross humours and eruptions, feverish and bilious complaints, and are the safest and mildest purgative that can be used on any occasion.

Description of Worms, and the symptoms by which they are known.

Worms which infest the human body are chiefly of four kinds viz.—The Teres or large round worm; the Ascarides or small maw-worm; the Cucurbitine or short flat white worm; and lastly, the Tænia or tape-worm, so called from its resemblance to tape. This is often many yards long and is full of joints. It is most hurtful and most difficult to remove.

Among the symptoms attending worms are—disagreeable breath, especially in the morning; bad and corrupted gums; itching in the nose, and about the seat; convulsions, epileptic fits, and sometimes privation of speech; starting and grinding of the teeth in sleep; irregular appetite, sometimes loathing food and sometimes voracious; purging with slimy and fœtid stools; vomiting; large and hard belly; pains and sickness at the stomach; pains in the head and thighs and lowness of spirits; slow fever with small and irregular pulse; a dry cough; excessive thirst; sometimes pale and unhealthy countenance, and sometimes the face bloated and flushed.

Persons afflicted with any of the above symptoms should have immediate recourse to Hamilton's Worm Destroying Lozenges, which have been constantly attended with success in all complaints similar to those above described.

A dose of this medicine given occasionally during the warm season, will effectually prevent "the vomiting and purging of children"—a dreadful disorder, which annually destroys thousands of the infant part of our citizens. It is likewise the mildest and most certain remedy known, and has restored to health and strength a great number when in an advanced stage of this fatal complaint. Particular and plain instructions are given for every part of the necessary treatment in such cases.

Children generally take this medicine with eagerness; having a pleasing appearance, and an agreeable taste.

The Restorative Powder for the Teeth and Gums.

For the prevention and cure of BILIOUS AND MALIGNANT FEVERS is recommended

HAHN'S ANTI BILIOUS PILLS

THIS Medicine has been attended with a degree of success highly grateful to the inventor's feelings in several parts of the West Indies and in the Southern and Middle States, &c.

The testimony of a number of persons can be adduced, who have reason to believe that a timely use of this salutary remedy has, under Providence, preserved their lives when in the most alarming circumstances.

Facts of this conclusive nature speak more in favour of a medicine than columns of pompous eulogy founded on mere assertion.

It is not indeed presumptuously proposed as an infallible cure, but the inventor has every possible reason that can result from extensive experience for believing that a dose of these Pills taken once in every two weeks during the prevalence of our bilious fevers, will prove an infallible preventive; and further, that in the earlier stages of those diseases their use will very generally succeed in restoring health, and frequently in cases esteemed desperate and beyond the power of common remedies.

The operation of these pills is perfectly mild, so as to be used with safety by persons in every situation and of every age.

They are excellently adapted to carry off superfluous bile and prevent its morbid secretions—to restore and amend the appetite—to produce a free perspiration and thereby prevent colds which are often of fatal consequences. A dose never fails to remove a cold if taken on its first appearance: they are celebrated for removing habitual costiveness—sickness at the stomach and severe head-ache—and ought to be taken by all persons on a change of climate.

They have been found remarkably efficatious in preventing and curing disorders attendant on long voyages, and should be procured and carefully preserved for use by every seaman.

—

Hamilton's Elixir,

A sovereign remedy for colds, obstinate coughs, asthmas, sore throats, catarrhs, and approaching consumptions.—To parents who have children afflicted with the *HOOPING COUGH*, this discovery is of the first magnitude, as it affords immediate relief, checks the progress, and in a short time entirely removes the most cruel disorders to which children are liable. The Elixir is perfectly agreeable, and the dose so small that no difficulty arises in taking it.

—

Hamilton's Grand Restorative,

Is recommended as an invaluable medicine for the speedy relief and permanent cure of

Nervous Disorders	Violent cramps in the stomach and back
Consumptions	
Lowness of spirits	
Loss of appetite	Indigestion
Impurity of blood	Melancholy
Hysteric affection	Gout in the stomach
Inward weaknesses and debility	Pains in the limbs
	Relaxations, etc.

—

Hamilton's Essence and Extract of Mustard.

A safe and effectual remedy for acute and chronic rheumatism, gout, rheumatic gout, palsy, lumbago, numbness, white swellings, chilblains, sprains, bruises, pain in the face and neck, etc. etc.

—

Lee's Ointment for the Itch.

Warranted an infallible remedy at one application, may be used with perfect safety by pregnant women, or on infants a week old, not containing a particle of mercury or any dangerous ingredient whatever, and not accompanied with that tormenting smart which attends the application of other remedies.

—

Hahn's true & genuine German Corn Plaister.

An infallible remedy for corns, speedily removing them root and branch, without giving any pain.

—

The Genuine Persian Lotion,

So celebrated among the fashionable throughout Europe, is an invaluable cosmetic, perfectly innocent and safe, free from corrosive and repellent minerals, the basis of other lotions, and of unparalleled efficacy in removing blemishes of the face and skin, freckles, pimples, inflamatory redness, scurfs, tetters, ringworms, sunburns, prickly heat, &c.

—

Hahn's genuine Eye Water,

A sovereign remedy for all diseases of the eyes, whether the effect of natural weakness or of accident.

—

Tooth Ache Drops,

The only remedy yet discovered which gives immediate and lasting relief in the most severe instances.

—

Lee's Infallible Ague and Fever Drops

For the cure of agues, remittent and intermittent fevers.

☞ At the place of sale pamphlets may be had gratis, describing cures performed by the above medicines; the number, importance and respectability of which, fully justify every article of this advertisement.

Sold only wholesale and retail, by
